

M17 / ASSESSMENT

M17 Module Revision Test

Standalone Zero-to-Job-Ready Data Engineer 2026

Study, practise, check and explain.

A complete learning route

Start with the lesson video. Read the worked explanation beside it, pause to reproduce the example, then solve the supplied task. The books contain your study notes; keep your own work and results as evidence.

Use the protected answers after saving your first attempt. A changed retry shows what you can now do independently. There is no forced timer during learning.

One course. M00-M19. 264 lessons and 50 project phases.

Read this first 3

1. DE17-01 3

2. DE17-02 3

3. DE17-03 3

4. DE17-04 3

5. DE17-05 3

6. DE17-06 3

7. DE17-07 3

8. DE17-08 3

9. DE17-09 3

10. DE17-10 3

Read this first

Close learner book, videos and reviews. Save a genuine attempt before opening protected answers. Untimed mastery first.

1. DE17-01

A stakeholder says: hourly sales by 07:00, RPO zero for accepted raw data, small team, PII must not reach BI. Produce requirements/constraints and a first architecture with evidence.

2. DE17-02

Classify payroll, fraud alerts and daily revenue as batch/micro-batch/stream/hybrid. Justify by decision latency, replay and state.

3. DE17-03

Design a warehouse/lakehouse boundary for finance BI plus Spark clickstream/ML. State why one platform does not have to own everything.

4. DE17-04

Compare managed versus self-operated Kafka for a four-person team using a weighted ownership scorecard.

5. DE17-05

A pipeline stages 50k, 30k and 12k events/sec; target is 20k. Identify bottleneck and two valid remedies.

6. DE17-06

Define failure domains and RTO/RPO recovery for raw evidence, compute, checkpoint and serving data.

7. DE17-07

Compare a serverless 8 TB/day scan at 5 units/TB with a 120 units/day cluster over 30 days; then test 2x volume.

8. DE17-08

Create a persona/data/action matrix for ingest, transform, analyst and support identities with one prohibited action each.

9. DE17-09

Place CDC, contract, Vault, data mesh and Kubernetes on one architecture and state the distinct problem each solves.

10. DE17-10

Defend a complete architecture in requirement -> decision -> evidence -> trade-off -> failure order, and answer three reviewer challenges.
