

M19 / STUDY COMPANION

M19 Quick Revision Book

Standalone Zero-to-Job-Ready Data Engineer 2026

Study, practise, check and explain.

A complete learning route

Start with the lesson video. Read the worked explanation beside it, pause to reproduce the example, then solve the supplied task. The books contain your study notes; keep your own work and results as evidence.

Use the protected answers after saving your first attempt. A changed retry shows what you can now do independently. There is no forced timer during learning.

One course. M00-M19. 264 lessons and 50 project phases.

Ready-made job-launch recall. Use after practice; do not rewrite the learner book.

DE19-01 | Truthful one-page Data Engineer resume

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-02 | GitHub and project portfolio final polish

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-03 | LinkedIn/professional profile without overclaiming

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-04 | Degree-aware job targeting: apply/skip rules

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-05 | SQL interview drills

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-06 | Python interview drills

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-07 | Data-engineering concepts and troubleshooting drills

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-08 | Project walkthrough interview

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-09 | Architecture/system-design defense for junior roles

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-10 | Behavioral answers and career-transition story

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-11 | Technical English: explain code, failures and decisions clearly

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-12 | Application tracker, feedback loop and weekly repair cycle

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-13 | Timed coding test: arrays, strings and hash-map problems

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.

DE19-14 | Combined SQL + Python interview simulation

Truth -> evidence -> validation -> limitation -> changed retry. Be able to produce the artifact or answer cold, then handle “why?”, “what fails?”, and “how do you know?”.
