

M15 Completion Record

Evidence-based; no numeric shortcut

CONTROLLED COMPLETION

Completion record - identity

Learner

Name / date / environment: _____

Module

M15 - Azure + Microsoft Fabric Data Engineering

Rule

Do not mark complete by percentage. Each required competency needs evidence; unresolved critical failure blocks completion.

Lesson evidence checklist

Lessons 01-08

Record evidence path/status for architecture, IAM, OneLake, workspace/items, paths/shortcuts, Lakehouse/Delta, notebook reproducibility and runtime compatibility.

Lessons 09-16

Record evidence for pipeline failure safety, SQL serving choice, medallion, incremental state, security/connections, monitoring/cost, lifecycle and end-to-end defense.

Practical + runtime boundary

Practical

Retail Orders integrated practical passed with evidence: YES / NO / REPAIR

Live Fabric pending

List any cloud actions still only OFFLINE PLAN/SIMULATOR. They remain pending for later Gate/runtime certification.

Critical failures

List any unresolved security/data-loss/state-progression/reconciliation issue. Any one blocks completion.

Decision and next route

M15 decision

DEMONSTRATED / REPAIR / LIVE-RUNTIME-PENDING

Next

After M15 competency completion continue M16. G06 stays locked until M15 + M16 + M17 evidence exists.

Integrity

Original failed attempts remain append-only. Review use and changed retry are recorded; no manual status override.
