

M15 Protected Review + Repair

Open only after a genuine saved attempt

PROTECTED | APPEND-ONLY ATTEMPTS

Close Review before changed retry.

DE15-01 - Cloud fundamentals for data engineers

REVIEW | Teaching Book p6 | route page 2

STOP - attempt required

Open only after a genuine saved attempt exists at ``04_PRACTICE_FILES/lesson_workspaces/DE15-01/attempt.md``.

Expected competency

architecture map.

Diagnosis lens

Missing a durable state, identity boundary, or monitoring signal means the architecture is incomplete.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 2 for a changed micro-proof.

DE15-02 - Identity, IAM and least privilege

REVIEW | Teaching Book p9 | route page 3

STOP - attempt required

Open only after a genuine saved attempt exists at `04\_PRACTICE\_FILES/lesson\_workspaces/DE15-02/attempt.md`.

Expected competency

least-privilege permission matrix.

Diagnosis lens

Admin-by-default, vague personas, or no negative permission test are repair signals.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 3 for a changed micro-proof.

DE15-03 - Azure Storage concepts and OneLake

REVIEW | Teaching Book p12 | route page 4

STOP - attempt required

Open only after a genuine saved attempt exists at `04\_PRACTICE\_FILES/lesson\_workspaces/DE15-03/attempt.md`.

Expected competency

copy vs shortcut decision.

Diagnosis lens

A choice without ownership/freshness/recovery reasoning is not demonstrated.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 4 for a changed micro-proof.

DE15-04 - Fabric workspace and item model

REVIEW | Teaching Book p15 | route page 5

STOP - attempt required

Open only after a genuine saved attempt exists at `04\_PRACTICE\_FILES/lesson\_workspaces/DE15-04/attempt.md`.

Expected competency

workspace/item inventory.

Diagnosis lens

Two items with the same vague responsibility or no owner/proof requires repair.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 5 for a changed micro-proof.

DE15-05 - OneLake paths, files, tables and shortcuts

REVIEW | Teaching Book p18 | route page 6

STOP - attempt required

Open only after a genuine saved attempt exists at `04\_PRACTICE\_FILES/lesson\_workspaces/DE15-05/attempt.md`.

Expected competency

OneLake path and shortcut map.

Diagnosis lens

Treating Files and Tables as interchangeable or ignoring external ownership requires repair.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 6 for a changed micro-proof.

DE15-06 - Fabric Lakehouse and Delta tables

REVIEW | Teaching Book p21 | route page 7

STOP - attempt required

Open only after a genuine saved attempt exists at ``04_PRACTICE_FILES/lesson_workspaces/DE15-06/attempt.md``.

Expected competency

Lakehouse/Delta contract.

Diagnosis lens

Changing raw data, hiding rejected rows, or skipping reconciliation requires repair.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 7 for a changed micro-proof.

DE15-07 - Fabric notebooks

REVIEW | Teaching Book p24 | route page 8

STOP - attempt required

Open only after a genuine saved attempt exists at ``04_PRACTICE_FILES/lesson_workspaces/DE15-07/attempt.md``.

Expected competency

rerunnable notebook flow.

Diagnosis lens

Hard-coded environment values or no clean-start rerun proof requires repair.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 8 for a changed micro-proof.

DE15-08 - Spark in Fabric

REVIEW | Teaching Book p27 | route page 9

STOP - attempt required

Open only after a genuine saved attempt exists at ``04_PRACTICE_FILES/lesson_workspaces/DE15-08/attempt.md``.

Expected competency

Fabric runtime compatibility checklist.

Diagnosis lens

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 9 for a changed micro-proof.

DE15-09 - Fabric Data Pipelines

REVIEW | Teaching Book p30 | route page 10

STOP - attempt required

Open only after a genuine saved attempt exists at ``04_PRACTICE_FILES/lesson_workspaces/DE15-09/attempt.md``.

Expected competency

pipeline dependency and failure graph.

Diagnosis lens

A downstream publish that can run after failed validation is a critical failure.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 10 for a changed micro-proof.

DE15-10 - SQL analytics endpoint and warehouse choice

REVIEW | Teaching Book p33 | route page 11

STOP - attempt required

Open only after a genuine saved attempt exists at `04\_PRACTICE\_FILES/lesson\_workspaces/DE15-10/attempt.md`.

Expected competency

SQL endpoint vs Warehouse choice.

Diagnosis lens

Choosing by product name without workload/write contract requires repair.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 11 for a changed micro-proof.

DE15-11 - Medallion architecture in Fabric

REVIEW | Teaching Book p36 | route page 12

STOP - attempt required

Open only after a genuine saved attempt exists at `04\_PRACTICE\_FILES/lesson\_workspaces/DE15-11/attempt.md`.

Expected competency

medallion architecture.

Diagnosis lens

Bronze mutation, unclear grain change, or no reconciliation requires repair.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 12 for a changed micro-proof.

DE15-12 - Incremental loads and MERGE in cloud

REVIEW | Teaching Book p39 | route page 13

STOP - attempt required

Open only after a genuine saved attempt exists at ``04_PRACTICE_FILES/lesson_workspaces/DE15-12/attempt.md``.

Expected competency

incremental MERGE state transition.

Diagnosis lens

Advancing progress before durable publish or duplicate effect on rerun is critical.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 13 for a changed micro-proof.

DE15-13 - Permissions, connections and secrets

REVIEW | Teaching Book p42 | route page 14

STOP - attempt required

Open only after a genuine saved attempt exists at ``04_PRACTICE_FILES/lesson_workspaces/DE15-13/attempt.md``.

Expected competency

permissions, connections and secrets.

Diagnosis lens

Plaintext credentials, over-broad grants or untested denied access is critical.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 14 for a changed micro-proof.

DE15-14 - Monitoring, reliability and cost awareness

REVIEW | Teaching Book p45 | route page 15

STOP - attempt required

Open only after a genuine saved attempt exists at ``04_PRACTICE_FILES/lesson_workspaces/DE15-14/attempt.md``.

Expected competency

monitoring/reliability/cost runbook.

Diagnosis lens

Green status alone, no business control, or optimization before diagnosis requires repair.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 15 for a changed micro-proof.

DE15-15 - Git, deployment and environment separation

REVIEW | Teaching Book p48 | route page 16

STOP - attempt required

Open only after a genuine saved attempt exists at ``04_PRACTICE_FILES/lesson_workspaces/DE15-15/attempt.md``.

Expected competency

Git/deployment/environment separation.

Diagnosis lens

Hard-coded production values or no rollback/post-deploy proof requires repair.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 16 for a changed micro-proof.

DE15-16 - End-to-end Fabric data engineering case

REVIEW | Teaching Book p51 | route page 17

STOP - attempt required

Open only after a genuine saved attempt exists at ``04_PRACTICE_FILES/lesson_workspaces/DE15-16/attempt.md``.

Expected competency

end-to-end Fabric evidence index.

Diagnosis lens

Mixing simulated evidence with live claims, missing reconciliation, or no recovery route requires repair.

Targeted repair

Compare only the failed idea with the Teaching Book/current source. Do not copy a finished architecture or fabricate cloud proof.

Changed reassessment

Close this Review, preserve attempt 1, then use retry page 17 for a changed micro-proof.

Module practical repair routing

Protected - practical attempt must already exist

Do not copy a final solution

Diagnose the weakest competency only: data contract/reconciliation, incremental state, security, orchestration, monitoring, lifecycle or evidence truth.

Targeted repair

Reopen only the matching M15 lesson/current source. Preserve the failed practical attempt and write the exact failure cause.

Changed reassessment

Close this Review and use the Maintenance Assets reassessment on the final page of the Fresh Changed Retry book.

Critical rule

A simulated/local pass cannot repair a missing LIVE FABRIC claim. Missing live proof stays runtime-pending until genuinely executed.
