

G06 Evidence & Attempt Record

Append-only mastery evidence

Record every Gate attempt. Never overwrite a failed A with a later B/C result.

Field	Record
Attempt	A / B / C
Date/time	
Domain	
Evidence packet path/hash	
K1..K7 result	PASS / REPAIR per competency
Critical unresolved failure?	YES / NO + details
Runtime truth	What actually ran vs designed/simulated
Review opened after saved attempt?	YES / NO
Repair completed	
Fresh retry assigned	
Final Gate-family state	PASS only when all competencies proven and no critical failure remains

Mentor state rule

Normal study exposes Gate A. Review A unlocks only after a saved A attempt. B/C and their Reviews stay sealed until explicitly assigned. Attempt history is append-only; no percentage score is stored as mastery truth.
