

M06 Protected Review and Repair

13 lesson-matched routes | PROTECTED

Mastery is competency-based, never inferred from a percentage. Save the first attempt. If materially weak, open only the matching protected Review, perform targeted repair, close it, then complete the assigned changed retry. The failed attempt stays in history.

DE06-01 - Verify WSL2 and choose a safe Linux workspace

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

If `wsl --install` shows help, inspect existing distros first. Use current Microsoft troubleshooting instead of random manual feature changes.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T01 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-02 - Linux navigation and safe file operations

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

If location or target is uncertain, stop and run `pwd` plus `ls -la`. Never use `rm -rf` to resolve uncertainty.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T02 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-03 - Pipes, redirection, history and text inspection

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

Run each stage separately. Do not add more pipes while you are unsure which stage changed the result.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T03 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-04 - Permissions, packages, sudo and command safety

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

Permission denied? Inspect owner, path and permission bits first. Do not jump straight to sudo or chmod 777.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T04 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-05 - Git state: init, status, add, commit, diff and log

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

If you are unsure what is staged, do not commit. Use `git status`, `git diff` and `git diff --staged` first.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T05 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-06 - Branches, merges and real conflict resolution

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

Use git status to list unmerged paths and inspect the file. If confused, stop before destructive reset; the lesson review explains safe abort/retry options.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T06 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-07 - GitHub remotes: clone, push, fetch, pull and tracking

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

If histories diverge, inspect git status, branch -vv and log --all --graph before choosing merge/rebase/reset.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T07 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-08 - Pull requests and review workflow

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

If the PR contains unrelated files, do not explain them away. Repair the branch/commits so the diff itself becomes reviewable.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T08 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-09 - Python virtual environments inside a repository

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

If activation/path is confusing, inspect which python/python3 and sys.executable. Never solve it by committing the environment directory.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T09 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-10 - .gitignore, secrets and repository hygiene

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

If a real credential ever reaches Git history, stop normal practice, revoke/rotate it and follow provider/GitHub cleanup guidance. Do not continue as though deletion solved exposure.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T10 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-11 - restore, revert, reflog and safe history repair

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

Before any recovery command, classify the mistake: uncommitted content, staged content, committed/shared history, or lost reference. Then choose the smallest safe tool.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T11 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-12 - Shell scripts, exit codes and environment-driven commands

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

If behavior differs between interactive command and script, print only non-secret configuration/path state and inspect exit codes step-by-step.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T12 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.

DE06-13 - Repository handoff and clean-clone reproducibility

PROTECTED: open only after a genuine saved attempt for this lesson. This is a repair surface, not a first-pass tutorial.

Diagnose

If the clean clone fails, treat that as a project defect. Identify the hidden dependency, add a safe reproducible instruction/configuration, commit it, clone again and retest.

Targeted repair

Compare your attempt against the outcome and validation contract. Identify the smallest missing concept/state check. Reproduce only that weak step with a tiny safe example.

Close Review

Close this document before retrying. Do not copy commands/wording into the fresh attempt.

Fresh retry requirement

Use T13 in the Fresh Retest pack. The retry must use changed names/state/inputs and be validated independently.
