

M18 Project Evidence Workbook

50 phase records - evidence, not checkboxes

For each phase, save the actual `attempt.json` in the project workspace and use this workbook as your human-readable index. A blank row is not a hidden answer; it is a place to record your own observed evidence.

P01 - Reliable Batch Pipeline

Phase	Artifact / evidence path	Validation result	Change/failure + retry	Runtime truth
P01-01	_____	_____	_____	exec / static / pending: _____
P01-02	_____	_____	_____	exec / static / pending: _____
P01-03	_____	_____	_____	exec / static / pending: _____
P01-04	_____	_____	_____	exec / static / pending: _____
P01-05	_____	_____	_____	exec / static / pending: _____
P01-06	_____	_____	_____	exec / static / pending: _____
P01-07	_____	_____	_____	exec / static / pending: _____
P01-08	_____	_____	_____	exec / static / pending: _____
P01-09	_____	_____	_____	exec / static / pending: _____
P01-10	_____	_____	_____	exec / static / pending: _____
P01-11	_____	_____	_____	exec / static / pending: _____
P01-12	_____	_____	_____	exec / static / pending: _____

Project defense notes

- Problem / consumer / SLA: _____
- Source and trusted grain: _____
- Key quality/reconciliation evidence: _____
- Rerun/backfill rule: _____
- One failure + root cause + repair: _____
- One security boundary: _____
- One cost/scale trade-off: _____
- Honest limitation / unexecuted runtime: _____

P02 - Analytics Engineering Platform

Phase	Artifact / evidence path	Validation result	Change/failure + retry	Runtime truth
P02-01	_____	_____	_____	exec / static / pending: _____
P02-02	_____	_____	_____	exec / static / pending: _____
P02-03	_____	_____	_____	exec / static / pending: _____
P02-04	_____	_____	_____	exec / static / pending: _____
P02-05	_____	_____	_____	exec / static / pending: _____
P02-06	_____	_____	_____	exec / static / pending: _____
P02-07	_____	_____	_____	exec / static / pending: _____
P02-08	_____	_____	_____	exec / static / pending: _____
P02-09	_____	_____	_____	exec / static / pending: _____
P02-10	_____	_____	_____	exec / static / pending: _____
P02-11	_____	_____	_____	exec / static / pending: _____
P02-12	_____	_____	_____	exec / static / pending: _____
P02-13	_____	_____	_____	exec / static / pending: _____

Project defense notes

- Problem / consumer / SLA: _____
- Source and trusted grain: _____
- Key quality/reconciliation evidence: _____
- Rerun/backfill rule: _____
- One failure + root cause + repair: _____
- One security boundary: _____
- One cost/scale trade-off: _____
- Honest limitation / unexecuted runtime: _____

P03 - Scalable Lakehouse Pipeline

Phase	Artifact / evidence path	Validation result	Change/failure + retry	Runtime truth
P03-01	_____	_____	_____	exec / static / pending: _____
P03-02	_____	_____	_____	exec / static / pending: _____
P03-03	_____	_____	_____	exec / static / pending: _____
P03-04	_____	_____	_____	exec / static / pending: _____
P03-05	_____	_____	_____	exec / static / pending: _____
P03-06	_____	_____	_____	exec / static / pending: _____
P03-07	_____	_____	_____	exec / static / pending: _____
P03-08	_____	_____	_____	exec / static / pending: _____
P03-09	_____	_____	_____	exec / static / pending: _____
P03-10	_____	_____	_____	exec / static / pending: _____
P03-11	_____	_____	_____	exec / static / pending: _____
P03-12	_____	_____	_____	exec / static / pending: _____
P03-13	_____	_____	_____	exec / static / pending: _____

Project defense notes

- Problem / consumer / SLA: _____
- Source and trusted grain: _____
- Key quality/reconciliation evidence: _____
- Rerun/backfill rule: _____
- One failure + root cause + repair: _____
- One security boundary: _____
- One cost/scale trade-off: _____
- Honest limitation / unexecuted runtime: _____

CAP - Production Capstone - Marketplace Data Platform

Phase	Artifact / evidence path	Validation result	Change/failure + retry	Runtime truth
CAP-01	_____	_____	_____	exec / static / pending: _____
CAP-02	_____	_____	_____	exec / static / pending: _____
CAP-03	_____	_____	_____	exec / static / pending: _____
CAP-04	_____	_____	_____	exec / static / pending: _____
CAP-05	_____	_____	_____	exec / static / pending: _____
CAP-06	_____	_____	_____	exec / static / pending: _____
CAP-07	_____	_____	_____	exec / static / pending: _____
CAP-08	_____	_____	_____	exec / static / pending: _____
CAP-09	_____	_____	_____	exec / static / pending: _____
CAP-10	_____	_____	_____	exec / static / pending: _____
CAP-11	_____	_____	_____	exec / static / pending: _____
CAP-12	_____	_____	_____	exec / static / pending: _____

Project defense notes

- Problem / consumer / SLA: _____
- Source and trusted grain: _____
- Key quality/reconciliation evidence: _____
- Rerun/backfill rule: _____
- One failure + root cause + repair: _____
- One security boundary: _____
- One cost/scale trade-off: _____
- Honest limitation / unexecuted runtime: _____
