

M04 Review / Repair - Teaching RC2

OPEN ONLY AFTER SAVED ATTEMPT

Repair the missed skill, not your ego.

Read only the matching note, close review, then do a changed retry.

P01 repair note

SyntaxError means Python could not parse the written structure. Read the last traceback line and referenced file/line before editing.

Can you solve a changed version now without copying this note?

Answer in your own words before continuing.

P02 repair note

Numeric values must be numeric if you want numeric arithmetic. $\text{gross} = \text{qty} * \text{price}$; $\text{net} = \text{gross} * (1 - \text{discount})$.

Answer in your own words before continuing.

P03 repair note

strip/title return new strings. Save/use the returned value. f-strings make readable output.

Answer in your own words before continuing.

P04 repair note

Boundary wording controls operators. '2500 or more' means ≥ 2500 .

Can you solve a changed version now without copying this note?

Answer in your own words before continuing.

P05 repair note

List preserves ordered entries, set expresses uniqueness/membership, dict maps keys to values.

Can you solve a changed version now without copying this note?

Answer in your own words before continuing.

P06 repair note

Accumulator initialization belongs before the loop. Update once per relevant item.

Can you solve a changed version now without copying this note?

Answer in your own words before continuing.

P07 repair note

return gives the caller a reusable value; print only displays.

Can you solve a changed version now without copying this note?

Answer in your own words before continuing.

P08 repair note

Imports execute module top-level code. Keep reusable helpers safe; guard executable orchestration.

STOP - check your understanding

Can you solve a changed version now without copying this note?

Answer in your own words before continuing.

P09 repair note

Read traceback bottom-up: exception type/message then failing line/inputs. Fix one root cause at a time.

Can you solve a changed version now without copying this note?

Answer in your own words before continuing.

P10 repair note

Build paths deliberately and protect raw source. Write derived output elsewhere.

STOP - check your understanding

Can you solve a changed version now without copying this note?

Answer in your own words before continuing.

P11 repair note

Inspect DataFrame before transform. Filter correct population, group, then reconcile grouped sum to overall total.

STOP - check your understanding

Can you solve a changed version now without copying this note?

Answer in your own words before continuing.

P12 repair note

Big-O is growth intuition. Repeated list membership is generally linear; set/dict membership is typically average constant time.

Can you solve a changed version now without copying this note?

Answer in your own words before continuing.

P13 repair note

Small drills need return values + tests, not memorized one-liners.

STOP - check your understanding

Can you solve a changed version now without copying this note?

Answer in your own words before continuing.

P14 repair note

Dictionary when keys need counts/totals; set when you only need unique membership.
