

M05 Review / Repair - Teaching RC2

OPEN ONLY AFTER SAVED ATTEMPT

Use only the missed competency.

Read the note, close Review, then solve a changed retry.

P01 repair note

Raw orders: 6 rows; O03 blank amount; O04 invalid; O02 duplicated. Parser first; preserve raw.

STOP - check your understanding

Close Review. Can you solve a changed version now?

Do not turn the page until you can answer in your own words.

P02 repair note

customers top-level dict -> customers list. JSONL one object/line. O01=2 events, O02=1.

Close Review. Can you solve a changed version now?

Do not turn the page until you can answer in your own words.

P10 repair note

Environment credential; wrong key 401 needs repair, not endless retry.

STOP - check your understanding

Close Review. Can you solve a changed version now?

Do not turn the page until you can answer in your own words.

P11 repair note

Bound transient retries; respect Retry-After; partial pagination = incomplete.

STOP - check your understanding

Close Review. Can you solve a changed version now?

Do not turn the page until you can answer in your own words.

P12 repair note

DATABASE_URL + SQLAlchemy parameters + transaction + DB key/constraint.

STOP - check your understanding

Close Review. Can you solve a changed version now?

Do not turn the page until you can answer in your own words.

P13 repair note

Config outside code; secrets stricter; .env.example placeholders only.

STOP - check your understanding

Close Review. Can you solve a changed version now?

Do not turn the page until you can answer in your own words.

P14 repair note

Test pure rules; log context/counts without secrets.
