

M18 - Completion Record

PROJECT + CAPSTONE EVIDENCE GATE

A project is complete only when

- first attempt saved
- checker/tests or available static validations saved
- critical quality/reconciliation evidence saved
- one or more deliberate failures reproduced and repaired
- rerun/idempotency evidence saved
- README + architecture + runbook complete
- known limitations recorded
- technical defense completed without hidden solution

P1 - Reliable Batch Pipeline

Evidence	Record
first attempt path	
tests/checker	
critical control totals	
failure repaired	
rerun proof	
README/architecture/runbook	
defense date/result	
biggest limitation	

P2 - Analytics Engineering Platform

Evidence	Record
first attempt path	
tests/checker	
critical control totals	
failure repaired	
rerun proof	
README/architecture/runbook	
defense date/result	
biggest limitation	

P3 - Scalable Lakehouse Pipeline

Evidence	Record
first attempt path	
tests/checker	
critical control totals	
failure repaired	
rerun proof	
README/architecture/runbook	
defense date/result	
biggest limitation	

CAPSTONE - Marketplace Production Data Platform

Evidence	Record
first attempt path	
tests/checker	
critical control totals	
failure repaired	
rerun proof	
README/architecture/runbook	
defense date/result	
biggest limitation	

Final M18 gate

Evidence gate - prove before move-on

- P1 complete before P2.
- P2 complete before P3.
- P3 complete before Production Capstone.
- Capstone first end-to-end attempt saved before Incident Pack.
- All required capstone incident repairs saved.
- Public portfolio sanitized.
- M19 interview/job-launch module can now use these projects as evidence.
