

# ZERO TO JOB-READY DATA ENGINEER 2026

MASTER INDEX RC4 - MOBILE-FIRST EDITION - 27 AUG 2026 - NOT FINAL

|                    |                                |
|--------------------|--------------------------------|
| 264                | 20 / 20                        |
| Formal lessons     | Production modules represented |
| 50                 | 7 / 7                          |
| M18 project phases | Protected Gate RCs represented |

## Recovery milestone reached

All 20 production module RC slots and all 7 protected Gate RC slots are now represented.

Promotion Runway RC2 remains QA-passed and integrated.

## Why the course is still NOT FINAL

The current Mentor candidate is still 230 lessons / 6 Gates, while the frozen production curriculum requires 264 lessons / 7 Gates.

Remaining release work: Mentor rebuild/parity, documented real-runtime proofs, learner-PC smoke, Android Mentor smoke, and final package/index/hash parity.

## How to use this PDF

This edition is intentionally portrait and single-column so it stays readable when you use **Fit to width** on a phone. The XLSX remains the detailed control sheet with hashes and audit fields.

# Controlled Modules

20 production module RCs represented

## M00 - Computer, Setup & Learning Foundations

8 lessons | 4 visual/source map | 4 guided | 5 independent | 0 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M00\_COMPUTER\_SETUP\_RC1.zip

## M01 - Data Foundations + Essential Excel

15 lessons | 9 visual/source map | 12 guided | 10 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M01\_DATA\_FOUNDATIONS\_ESSENTIAL\_EXCEL\_RC1.zip

## M02 - SQL Foundations

14 lessons | 9 visual/source map | 12 guided | 14 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M02\_SQL\_FOUNDATIONS\_RC1.zip

## Controlled Modules - continued

### M03 - Advanced SQL + PostgreSQL / Database Thinking

16 lessons | 9 visual/source map | 12 guided | 14 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M03\_ADVANCED\_SQL\_POSTGRESQL\_DATABASE\_THINKING\_RC1.zip

### M04 - Python Foundations

16 lessons | 10 visual/source map | 12 guided | 14 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M04\_PYTHON\_FOUNDATIONS\_RC1.zip

### M05 - Python for Data Engineering

15 lessons | 9 visual/source map | 12 guided | 14 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M05\_PYTHON\_FOR\_DE\_RC1.zip

## Controlled Modules - continued

### M06 - Git + GitHub + Linux/WSL Engineering Foundations

**13 lessons** | 7 visual/source map | 10 guided | 8 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

**Package:** M06\_GIT\_GITHUB\_LINUX\_WSL\_ENGINEERING\_FOUNDATIONS\_RC1.zip

### M07 - PostgreSQL + Data Modeling

**13 lessons** | 7 visual/source map | 10 guided | 9 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

**Package:** M07\_POSTGRESQL\_DATA\_MODELING\_RC1.zip

### M08 - Files, APIs & Data Ingestion

**17 lessons** | 10 visual/source map | 15 guided | 16 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

**Package:** M08\_FILES\_APIS\_DATA\_INGESTION\_RC1.zip

## Controlled Modules - continued

### M09 - ETL/ELT + Data Quality + Transformation Engineering

**13 lessons** | 8 visual/source map | 10 guided | 10 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M09\_ETL\_ELТ\_DATA\_QUALITY\_TRANSFORMATION\_ENGINEERING\_RC1.zip

### M10 - Docker + Airflow

**19 lessons** | 10 visual/source map | 12 guided | 10 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M10\_DOCKER\_AIRFLOW\_RC2.zip

### M11 - Storage & File Formats Foundations

**10 lessons** | 6 visual/source map | 8 guided | 8 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M11\_STORAGE\_FILE\_FORMATS\_FOUNDATIONS\_RC1.zip

## Controlled Modules - continued

### M12 - Distributed Processing with Spark / PySpark

**18 lessons** | 12 visual/source map | 15 guided | 16 independent | 5 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M12\_DISTRIBUTED\_PROCESSING\_WITH\_SPARK\_PYSPARK\_RC1.zip

### M13 - Delta Lake + Lakehouse

**11 lessons** | 7 visual/source map | 10 guided | 9 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M13\_DELTA\_LAKEHOUSE\_RC2.zip

### M14 - Kafka + Streaming Foundations

**12 lessons** | 7 visual/source map | 10 guided | 9 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M14\_KAFKA\_STREAMING\_RC1.zip

## Controlled Modules - continued

### M15 - Azure + Microsoft Fabric Data Engineering

16 lessons | 9 visual/source map | 12 guided | 10 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M15\_AZURE\_FABRIC\_RC1.zip

### M16 - DataOps, CI/CD, Security & Observability

14 lessons | 8 visual/source map | 10 guided | 10 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M16\_DATAOPS\_SECURITY\_RC2.zip

### M17 - Architecture + Promotion Foundations

10 lessons | 6 visual/source map | 6 guided | 6 independent | 4 checks | 1 major | 1 fresh

**STATUS: Production RC represented**

Package: M17\_ARCHITECTURE\_RC2.zip

## Controlled Modules - continued

### M18 - Portfolio Projects + Production Capstone

**50 controlled project/capstone phases** - P01, P02, P03 and Production Capstone.

**STATUS: Production RC represented**

**Package:** M18\_PORTFOLIO\_PROJECTS\_CAPSTONE\_RC2.zip

### M19 - Interview, Technical English & Job Launch

**14 lessons** | 7 visual/source map | 8 guided | 10 independent | 4 checks | 2 major | 2 fresh

**STATUS: Production RC represented**

**Package:** M19\_INTERVIEW\_TECHNICAL\_ENGLISH\_JOB\_LAUNCH\_RC1.zip

# Protected Gates

7 / 7 production Gate RCs represented

## G01 - Data + Excel

Gate A: required   Fresh Gate B: required

**STATUS: Production Gate RC represented**

Package: G01\_DATA\_EXCEL\_RC1.zip

## G02 - SQL + PostgreSQL

Gate A: required   Fresh Gate B: required

**STATUS: Production Gate RC represented**

Package: G02\_SQL\_POSTGRESQL\_RC1.zip

## G03 - Python + Linux + Git

Gate A: required   Fresh Gate B: required

**STATUS: Production Gate RC represented**

Package: G03\_PYTHON\_LINUX\_GIT\_RC1.zip

## G04 - Pipeline Engineering

Gate A: required   Fresh Gate B: required

**STATUS: Production Gate RC represented**

Package: G04\_PIPELINE\_ENGINEERING\_RC1.zip

## G05 - Distributed/Lakehouse/Streaming

Gate A: required   Fresh Gate B: required

**STATUS: Production Gate RC represented**

Package: GATE\_05\_DISTRIBUTED\_LAKEHOUSE\_STREAMING\_RC1.zip

## G06 - Cloud + Production Engineering

Gate A: required   Fresh Gate B: required

**STATUS: Production Gate RC represented**

Package: GATE\_06\_CLOUD\_PRODUCTION\_RC1.zip

## **G07 - Final Job-Ready Simulation**

**Gate A:** required   **Fresh Gate B:** required

**STATUS: Production Gate RC represented**

**Package:** GATE\_07\_FINAL\_JOB\_READY\_RC1.zip

# Remaining Release Blockers

Artifact recovery is closed; these checks still block FINAL

## 1. Mentor parity - CRITICAL

Rebuild the Mentor from 230 lessons / 6 Gates to exact 264 lessons / 7 Gates, then re-audit navigation, locks, progression, device tags, evidence paths and exports.

## 2. Live runtime proofs

Complete the module-specific checks that cannot be proven in this artifact environment: live PostgreSQL; Docker/Airflow; M11 Parquet/Delta runtime; M12 Spark/PySpark; later Delta/Kafka/Fabric/GitHub Actions/IaC paths; and cross-stack capstone runtime.

## 3. Fresh learner-PC smoke

Run setup/path/runtime checks on the actual learner PC and record only observed evidence.

## 4. Android Mentor smoke

Verify phone navigation, persistence, timer/background behavior, notifications, exports and correct PC REQUIRED routing on a real Android device.

## 5. Final release parity

After the Mentor rebuild, assemble the final bytes and rerun curriculum coverage, duplicate, path, master-index, package integrity and SHA-256 parity.

## Release rule

**Do not label the course FINAL or the Mentor DEPLOYED until every blocker above passes on the final assembled bytes.**
