

Gate 7A - Review

Open only after saved first attempt | RC1

Review dimensions

- Requirements/grain/key interpretation
- Ingestion/raw preservation
- Quality/quarantine/reconciliation
- Modeling and transformation tests
- Idempotency/late data/backfill
- Orchestration and failure recovery
- Spark/Delta performance judgment
- Fabric/cloud/security/CI/monitoring
- Git/reproducibility/documentation
- Technical defense

Repair workflow

- Classify every failed item by competency.
- Record root cause and production consequence.
- Repair in a copy; preserve original evidence.
- Rerun checker plus affected tests.
- Explain why the repair survives another rerun and 10x scale.

Retest rule

After targeted repair, take Gate 7B on the fresh renewable-energy operations domain. Do not mechanically rename or copy the Gate 7A design.
