

# M10 Module Review

---

## Open after Module Practical attempt

*Release Candidate 2 - controlled learner candidate*

| Control     | Expected                                                       |
|-------------|----------------------------------------------------------------|
| Pipeline    | 4 source / 2 valid / 2 rejected                                |
| Dockerfile  | buildable pattern, non-root CMD                                |
| Compose     | db + pipeline + persistent volume + secret + DB_HOST=db        |
| Dag         | helpdesk_daily with schedule/catchup false/tasks/retry         |
| Security    | no real secret committed                                       |
| Reliability | downstream blocked on validation failure; rerun plan explained |
