

M13 - Module Review

Open after Module Practical attempt | RC2

Control profile: changes file has 3 rows but 2 unique product IDs; Silver ends with 4 products; Gold has 3 categories; replay remains 4 products. The latest version value in the known-good control assumes initial table creation plus two deterministic merge executions in the lab contract.

Repair map

- Duplicate products -> L07 merge/source-dedupe repair.
- History/version confusion -> L03/L06 repair.
- Wrong layers -> L09 repair.
- Schema surprise -> L05 repair.
- File-layout reasoning weak -> L10 repair.
