

M14 - Module Review

Open after Module Practical attempt | RC1

Control: 8 raw events; 7 schema-valid; 1 invalid; 1 duplicate event ID; 6 unique events; 3 unique orders; latest statuses = PAID 2 / CANCELLED 1. Correct partition key is order_id. Safe design requires sink replay safety and commit-after-success reasoning.

Repair map

- Ordering/key weak -> L03/L05 repair.
- Offsets/replay weak -> L06 repair.
- Commit/idempotency weak -> L04/L08 repair.
- Schema weak -> L09 repair.
- Lag/recovery weak -> L12 repair.
